Introduction

This report provides 2009/10 data from the Disability Services National Minimum Data Set (DS NMDS). The DS NMDS collection is:

- ⊕ a set of nationally significant data items or pieces of information that are collected in all Australian jurisdictions: and
- ⊕ an agreed method of collection and transmission.

The purpose of the DS NMDS collection is to facilitate the annual collation of nationally comparable data about specialist disability services, and to obtain reliable, consistent data with minimal load on the disability services field. Under the NDA, the Disability Administrators in all Australian jurisdictions are responsible for ensuring that DS NMDS information will be comparable across all jurisdictions and years.

The DS NMDS provides information relating to Disability funded service outlets and users of these services, including support needs of users and informal carer arrangements.

Why is the data collected

In the past, CSTDA NMDS data has been used for a wide range of purposes, such as for planning, national program evaluation and to monitor achievement of program objectives and agreed priorities. Specific examples of uses to which the data have been put, are:

- ⊕ support budget submissions for increased funding or changing funding emphasis
- ⊕ support planning for future service delivery
- ⊕ resist proposals to increase the level of service user contributions by demonstrating the high proportion of CSTDA service users who have benefits or pensions as their main income source
- ⊕ provide national comparisons of numbers of service users living in institutional versus community-based settings
- ⊕ indicate that certain groups of people (e.g. people of Aboriginal and Torres Strait Islander origin) are not accessing services as much as could be expected.

Full-year data about service users can also provide:

- ⊕ a profile of all people receiving a CSTDA-funded service in a financial year
- ⊕ data on carer arrangements, which enables issues relating to ageing carers to be monitored and planned for
- ⊕ information about the quantity of services provided to some service users can be examined in relation to various characteristics of service users, such as their support needs, disability group, carer arrangements and whether they live in metropolitan or rural locations.

Acknowledgement

- The data provided in this report is based on the final 2009/10 DS NMDS data prepared by the Australian Institute of Health and Welfare (AIHW). Information is for **South Australia only**. The figures in this document **do not** include employment services, which are managed exclusively by the Australian Government.

- *For the purpose of this report, the reference to government refers to Disability Services only and Non Government may include Local Government, other State Government agencies, for profit and not for profit organisation.*

Information in this report

This report is broken into four parts. Part one provides a profile of South Australia. Part two provides information using a two-way split to report Government and Non Government separately, while part three reports the data using a three way split, identifying clients that are unique to Government, Non Government or those who received a service from both. Part four provides a comparison of the data over five years.

PART ONE— DISABILITY SECTOR PROFILE

The data provided in parts one, two and three of this report is based on the final 2009/10 DS NMDS data prepared by the Australian Institute of Health and Welfare (AIHW). Information is for **South Australia only**. The figures in this document **do not** include employment services, which are managed exclusively by the Australian Government.

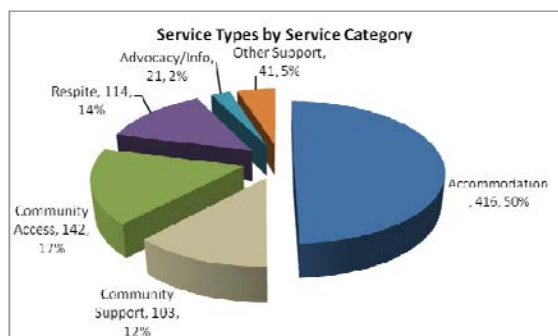

This section details clients, services and service outlet information for all agencies and clients who were funded with CSTDA/NDA funding during the 2009/10 financial year.

SERVICE TYPE OUTLET INFORMATION

A service type outlet is defined as the unit of the funded agency that delivers a particular CSTDA service type at, or from, a discrete location. A total of 837 Service Type Outlets participated in the 2009/10 data collection – an increase of 24 outlets from the 2008/09 collection.

Total Service Type Outlets

Of the total 837 Service Type Outlets that reported under the NMDS, 49% provided various types of accommodation support (the majority being group homes). A further 17% and 12% respectively identified Community Access and Community Support as their main service type.

Operational Details

A total of 778 (93%) outlets were funded for the full financial year. Of these service outlets, 596 provided services for 52 weeks of the year.

Location of Service Type Outlets

The majority (79%) of Service Type Outlets operating in 2009/10 were based in metropolitan locations with 21% located in country South Australia and less than 1% in Northern Territory.

Sector Responsibility

Of the 813 operational outlets, 199 (24%) were government and 638 (76%) were non-government.

DISABILITY CLIENTS - DEMOGRAPHIC DETAILS

Clients can receive more than one service type during the financial year. Therefore, total clients are less than total service types provided in the reporting period.

In 2009/10 a total of 20,784 unique individuals with a disability were provided with a total of 39,106 funded services. This represents a 3% increase in individuals and a 7.7% increase in services from last year (2008/09).

Country of Birth

Most clients (86%) were born in Australia.

Country	Total Unique Clients		
	2009-10	2008-09	2007-08
Australia	17961	17248	16,315
England	758	692	743
New Zealand	111	89	90
Italy	178	157	164
Viet Nam	63	63	54
Scotland	103	90	96
Greece	89	75	72
Germany	99	84	77
Philippines	32	26	25
India	36	31	36
Other	758	675	647
Not Stated	596	915	1,031
TOTAL	20,784	20,145	19,350

Geographical Location

71% of clients lived in the metropolitan area; 24% lived in country areas. Of the 251 clients reported with an interstate postcode, 116 of these were in the Northern Territory.

Indigenous Status

19,313 (93%) clients were reported as Not Aboriginal or Torres Strait Islander. 4% (841) were recorded as being Aboriginal and/or Torres Strait Islander.

Indigenous Status	Total clients
Aboriginal/Not TSI	771
TSI/Not Aboriginal	17
Both	53
Neither	19,313
Not Stated	630
TOTAL	20,784

Of the 841 Aboriginal and/or Torres Strait Islander clients, 61% were males and 39% were females.

Age by Sex

Of the total clients, 11,600 (56%) were males and 9,184 (44%) females.

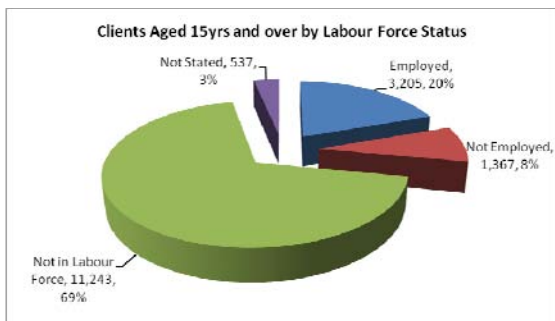

The most common age group for males was 10 to 19 years and for females, 50 to 59 years.

Source of Income/Labour Force Status

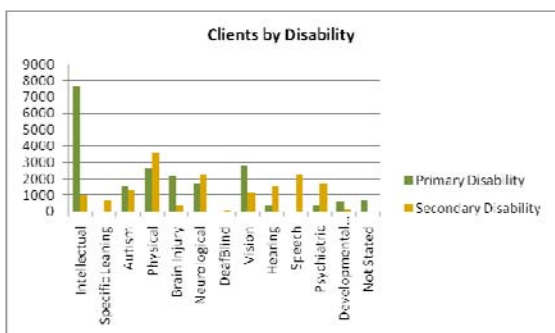

23% (4,745) of clients were less than 16 years, where income source is not applicable. For clients aged 16 years and over (16,039), 67% (10,809) identified the Disability Support Pension as their main source of income. 18% (2,882) of clients were recorded with an income of not known.

During 2009/10, there were 16,352 working-age clients (aged 15yrs or more) reported.

Disability Type

The most common primary disability types reported were intellectual (37%), vision (14%) and physical (13%). Secondary disability types were predominantly physical, speech and neurological.

Method of Communication

70% of clients reported that their main method of communication was effective spoken language; 1% used other effective non-spoken language and 1% used sign language. 18% had little or no effective communication method.

Interpreter Services

The majority of clients (91%) did not require interpreter services. 2% and 4% required an interpreter for spoken and non-spoken communication respectively.

Residential Setting

75% of clients lived in a private home. 7% lived in supported accommodation and 5% lived in group homes.

Living Arrangements

79% of clients either lived with family or with other individuals, while 17% lived alone.

Severity of Disability

A total of 8,586 clients were reported as having a severe level of disability, while 7,610 were reported as having a profound disability.

Note: The severity of disability assigned to each client is derived from their reported support needs in the areas of mobility, communication and self care.

CARER INFORMATION

A total of 12,009 clients were supported by unpaid carers. Of those, 11,336 (94%) were identified as a primary carer – that is, persons providing support with self-care, mobility or communication.

Existence of Carer	Total	%
Yes, have an unpaid carer	12,009	58
No, do not have a carer	8,090	39
Not stated	685	3
Total	20,784	100%

Co-Residency

Of the 12,009 clients supported by a carer, 10,351 (86%) of them lived in the same household.

Relationship with Client

The majority of carers (7,636 or 64%) were identified as the mother of the client. Partners of clients (wife, husband, male/female partner) accounted for 16% of carers.

Age Group of Carer

The majority of carers (78%) were between 25 and 64 years of age. A further 14% of carers were 65 years or over and less than 1% were under 25 years.

Of the 11,336 primary carers, there were 1,243 reported as living with clients as a co resident and their age was 65 years or more.

SERVICE TYPES PROVIDED

Service Types

Of the total services reported for 2009/10 (39,106), 22,333 (57%) were for community support. The majority of these were for case management 11,099 (50%).

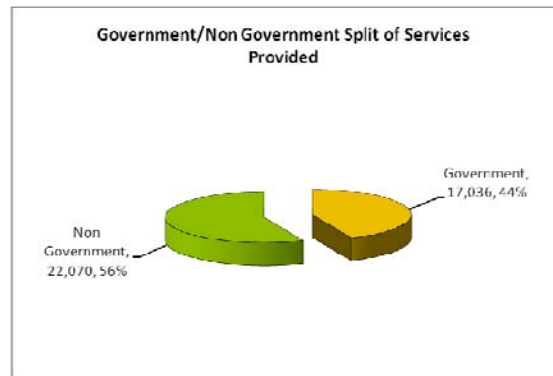

Total Services by Service Type

Service Types	Unique Clients	Total Services
Large Residential/Institution	621	622
Small Residential/Institution	27	27
Hostels	34	34
Group Homes	1,040	1,083

Other Respite	306	306
Total Respite	1,763	2,292

Service Type Distribution

Of the 39,106 services provided in 2009/10 there were 17,036 services provided to clients by Government and 22,070 services provided to clients by Non Government organisations.

Total Clients leaving the Service

A total of 3,510 services provide to 2,724 clients were closed during the year. The main reasons why clients left the service type were 'No longer required other' (28.4%), 'other' (22.3%) and 'client died' (15.9%)

Service Exit Reason	Total Services	%
No longer required - moved to mainstream	130	3.7%
No longer required - other	996	28.4%
Moved to residential, institutional or supported accommodation.	110	3.0%
Needs increased	198	5.6%
Moved out of area	549	15.6%
Died	560	15.9%
Service user terminated services	126	3.7%
Other	776	22.3%
Not Stated	65	1.8%
Total	3,510	100.00%

NOTE: Individuals can receive services from multiple service types and/or service categories therefore, the total clients should not be added. The total clients shown for each service type is a unique client total for that service type. The total service category figure is unique across the particular service category.

PART TWO - DS NMDS DISTRIBUTION BETWEEN GOVERNMENT AND NON GOVERNMENT SECTORS

Note: The Government and Non Government client numbers are not unique to the relevant sector in this section and clients who received a service from both Government and Non Government sectors have been counted in both. The client numbers from each sector should not be added.

For the purpose of this report, the reference to government refers to Disability Services only and Non Government may include Local Government, other State Government agencies, for profit and not for profit organisations.

Section A reports Government DS NMDS information. Section B reports DS NDMS information for Non Government organisations.

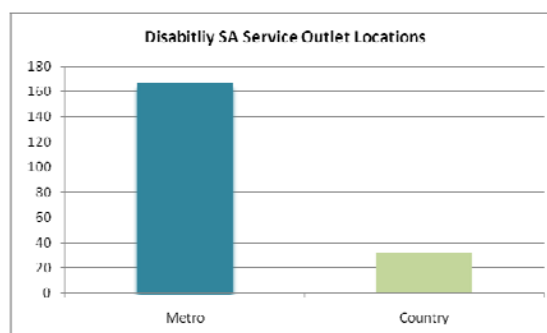

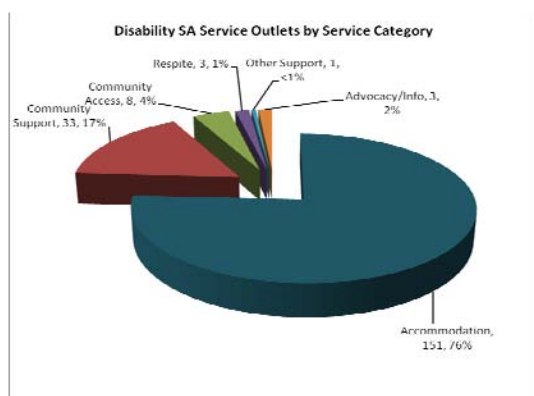

Of the 813 operational outlets, 199 (24%) were government and 638 (76%) were non-government.

Of the total clients reported who received a service in 2009/10 (20,784), 12,768 were provided with a service by the Government sector and 12,318 were provided with a service by the non Government sector.

Section A: GOVERNMENT DS NMDS INFORMATION (DISABILITY SERVICES)

DISABILITY SERVICES SERVICE TYPE OUTLET

Of the 199 Government Service Type Outlets reported, 76% provided various types of accommodation support (93% of these were group homes).

Disability Services Outlet Operational Details

A total of 195 (98%) outlets were funded for the full financial year. Of these service outlets, 100% provided services for 52 weeks of the year.

Disability Services - Location of Service Type Outlets

The majority (84%) of Service Type Outlets operating in 2009/10 were based in metropolitan locations with 16% located in country South Australia.

DISABILITY SERVICES – CLIENT DEMOGRAPHIC DETAILS

This section describes service outlets, client demographics and services provided by the Government sector (Disability Services). In 2009/10 Disability Services provided 12,768 individuals with a disability with a total of 17,036 services.

Disability Services Clients - Country of Birth

Most clients (91%) were born in Australia.

Country	Total Clients
Australia	11,631
England	329
New Zealand	78
Italy	86
Viet Nam	47
Scotland	42
Greece	52
Germany	43
Philippines	22
India	22
Other	416
TOTAL	12,768

Disability Services Clients - Indigenous Status

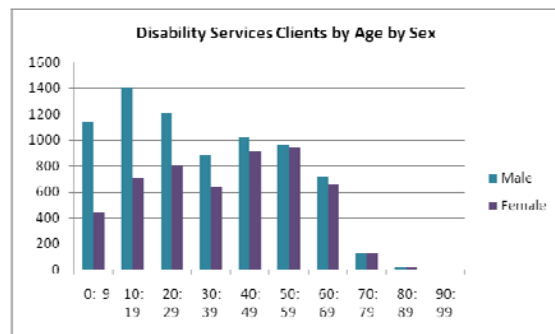

12,226 (96%) clients were reported as Not Aboriginal or Torres Strait Islander. Only 4% (542) were recorded as being Aboriginal and/or Torres Strait Islander.

Indigenous Status	Total clients
Aboriginal/Not TSI	482
TSI/Not Aboriginal	15
Both	45
Neither	12,226
Not Stated	0
TOTAL	12,768

Of the 542 Aboriginal and/or Torres Strait Islander clients, 62% were males and 38% were females.

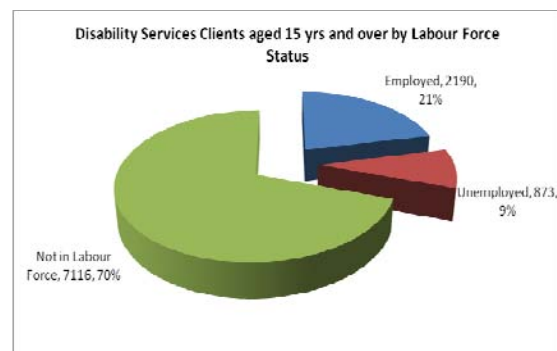

Disability Services Clients - Age by Sex

Of all clients, 7,499 (59%) were males and 5,269 (41%) females. The most common age group for males was 10 to 19 years and for females, 50 to 59 years.

Disability Services Clients - Source of Income/Labour Force Status

22% (2,797) of clients were less than 16 years where income source is not applicable. For clients aged 16 years and over (9,971), 85% of clients (8,527) identified the Disability Support Pension as their main source of income. There was 3% (317) of clients who were recorded with an income of not known.

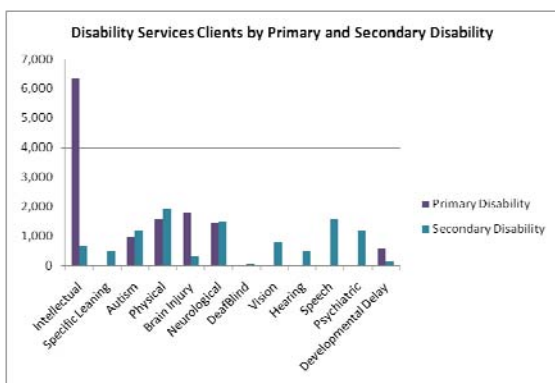

Disability Services Clients - Geographical Location

70% of clients lived in the metropolitan area; 26% lived in country areas. Postcodes for 365 clients were recorded as 'not stated'.

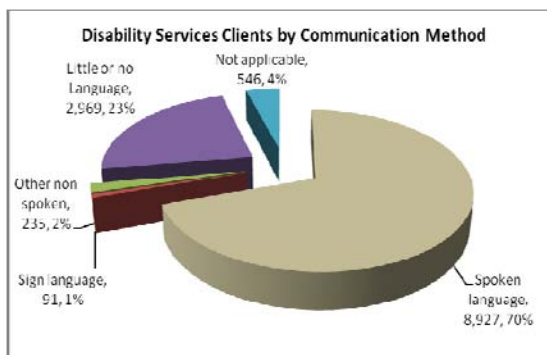

Disability Services Clients - Disability Type

The most common primary disability types reported were intellectual (50%), acquired brain injury (14%) and physical (12%). Secondary disability types were predominantly physical, speech and neurological.

Disability Services Clients—Method of Communication

70% of clients reported that their main method of communication was effective spoken language; 2% used other effective non-spoken language and 1% used sign language. 23% had little or no effective communication method.

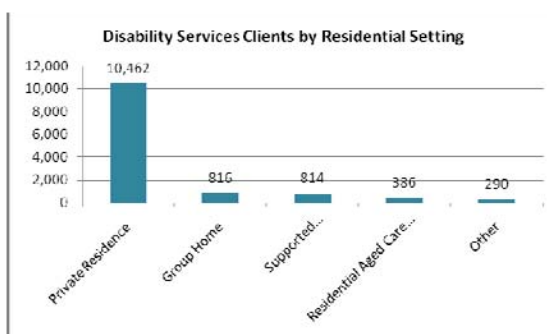

Disability Services Clients - Interpreter Services

The majority of clients (94%) did not require interpreter services. 2% and 4% required an interpreter for spoken and non-spoken communication respectively.

Disability Services Clients - Residential Setting

82% of clients lived in a private home. 6% lived in supported accommodation and 6% lived in group homes.

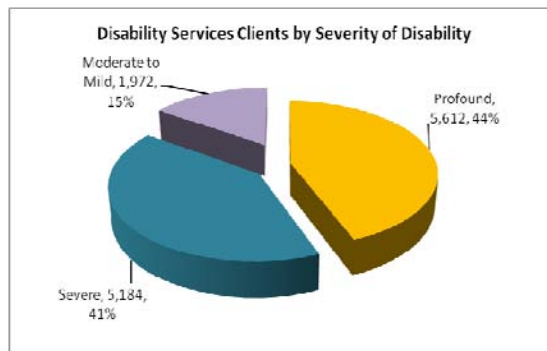

Disability Services Clients - Living Arrangements

85% of clients either lived with family or others with other individuals, while 15% lived alone.

Disability Services Clients - Severity of Disability

A total of 5,612 were reported as having a profound disability while 5,184 clients were reported having a severe disability.

Note: The severity of disability assigned to each client is derived from their reported support needs in the areas of mobility, communication and self care.

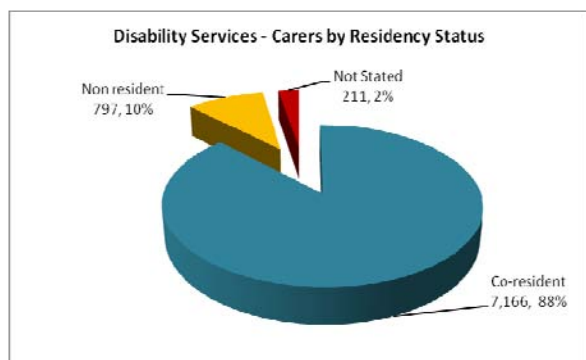

DISABILITY SERVICES CLIENTS - CARER INFORMATION

A total of 8,174 clients were supported by an unpaid carer. Of those 7,865 (96%) were identified as a primary carer – that is persons providing support with self-care, mobility or communication.

Existence of Carer	Total	%
Yes, have an unpaid carer	8,174	64%
No, do not have a carer	4,594	36%
Total	12,768	100.0%

Co-Residency

Of the 8,174 clients supported by a carer, 7,166 (88%) of them lived in the same household. Additionally, of the 7,865 carers identified as a primary carer, 830 lived in the same residence and were reported with an age of 65yrs or over.

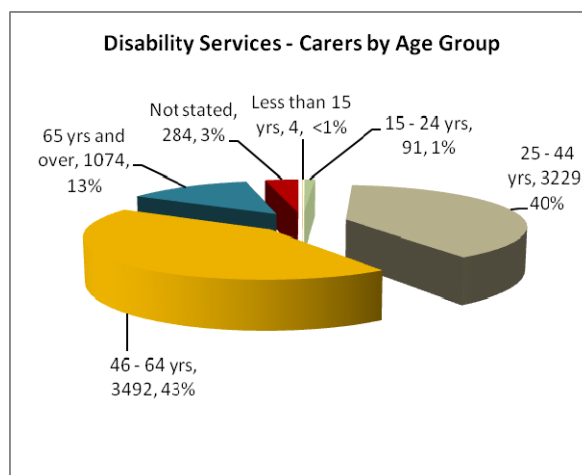

Relationship with Client

The majority of carers (5,360 or 66%) were identified as the mother of the client. Partners of clients (wife, husband, male/female partner) account for 15% of carers.

Age Group of Carer

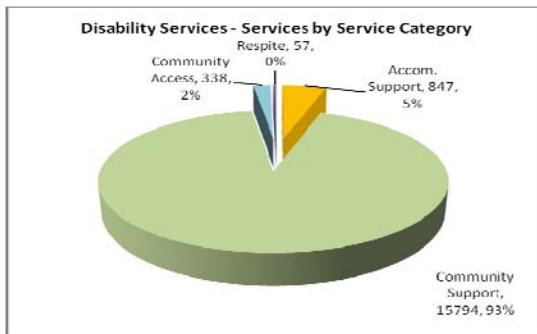

The majority of carers (83%) were between 25 and 64 years of age. A further 13% of carers were 65 years or over and 1% were less than 25 years. 3% of carers were recorded with an age group of not stated.

DISABILITY SERVICES - SERVICE TYPES PROVIDED

Disability Services - Services by Service Categories

Of the 17,036 services provided by Disability Services, 15,794 (93%) were for Community Support. Within the community support category, 10,137 (60%) were for case management.

Service Types	Clients	Services
Large Residential/Institution	306	307
Small Residential/Institution	6	6
Group Homes	482	505
Attendant Care/Personal Care	12	12
In-home Accommodation and Support	17	17
Total Accommodation Support	797	847
Therapy Support	2,239	2,266
Early Childhood Intervention	658	683
Behaviour/Specialist Intervention	78	78
Regional Resource and Support Teams	2,012	2,046
Case Management	9,902	10,137
Other Community Support	584	584
Total Community Support	12,602	15,794
Learning and Life Skills Development	62	67
Other Community Access	258	271
Total Community Access	320	338
Centre-Based Respite	43	43
Flexible Respite	14	14
Total Respite	55	57

Disability Services Clients leaving the Service

A total of 1,713 clients comprising 1,890 services left the various service types during the year. The main reasons why clients left the service type were 'no longer needs assistance from outlet – other' (40%), 'client moved out of area' (23%) and 'other' (19.3%)

Exit Reason	Total Services	%
No longer needs assistance - moved to mainstream	26	1.4%
No longer needs assistance - other	756	40.0%
Service user moved to accom setting	28	1.5%
User Needs Increased	10	.05%
Moved out of area	435	23.0%
Died	253	13.4%
Service user terminated arrangement	18	1.0%
Other	364	19.3%
Total	1,890	100%

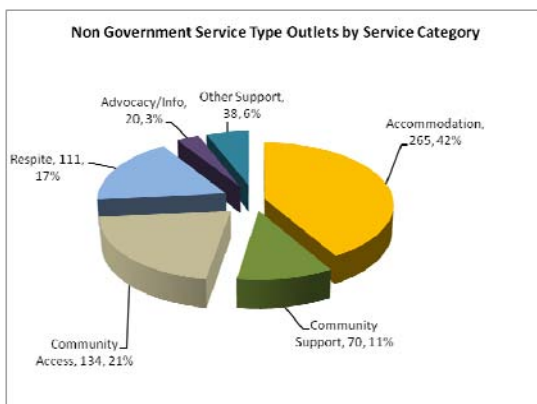

NOTE: Individuals can receive services from multiple service types and/or service categories. The total clients should not be added. The total number of individuals for each service type is a unique total for the service type. The total service category figure is unique across the particular service category.

Section B: NON GOVERNMENT DS NMDS INFORMATION

This section describes service outlets, client demographics and services provided by the non Government sector. In 2009/10 there were 12,318 clients who were provided with a total of 22,070 services by Non Government organisations.

NON GOVERNMENT SERVICE TYPE OUTLET

Of the 638 Non Government Service Type Outlets that reported under the DS NMDS, 42% provided various types of accommodation support (56% of these were group homes).

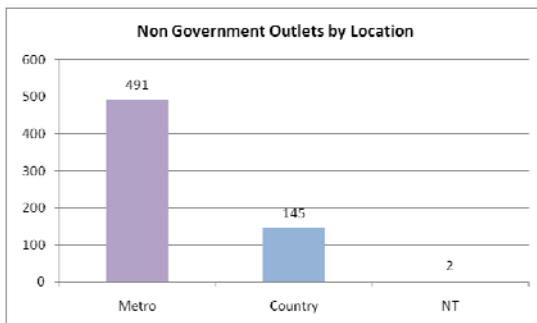

Non Government Operational Details

A total of 583 (91%) outlets were funded for the full financial year. Of these service outlets, 67% (401) provided services for 52 weeks of the year.

Non Government Location of Service Type Outlets

The majority (77%) of Service Type Outlets operating in 2009/10 were based in metropolitan locations with 23% located in country South Australia.

NON GOVERNMENT – CLIENT DEMOGRAPHIC DETAILS

Non Government Clients—Country of Birth

Most clients (83%) were born in Australia. 5% of clients had a country of birth recorded as not stated.

Country	Total Clients
Australia	10,191
England	586
New Zealand	59
Italy	131
Viet Nam	26
Scotland	77
Greece	62
Germany	79
Philippines	22
India	22
Other	467
Not Stated	596
TOTAL	12,318

Non Government Clients—Indigenous Status

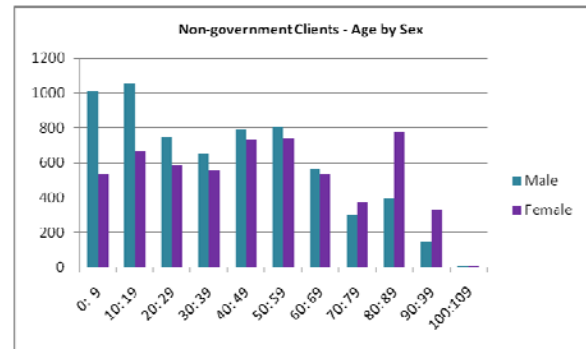

11,225 (91%) clients were reported as not Aboriginal or Torres Strait Islander. 4% (463) were recorded as being Aboriginal and/or Torres Strait Islander.

Of the 463 Aboriginal and/or Torres Strait Islander clients, 60% were males and 40% were females.

Indigenous Status	Total clients
Aboriginal/Not TSI	435
TSI/Not Aboriginal	10
Both	18
Neither	11,225
Not Stated	630
TOTAL	12,318

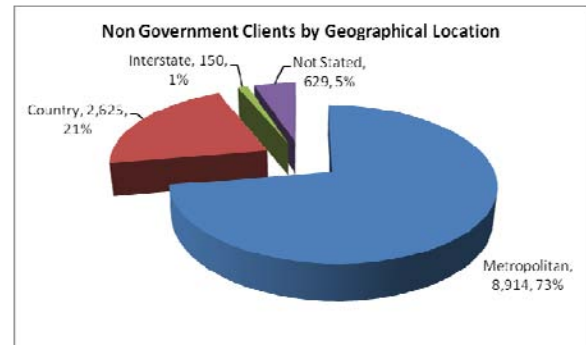

Non Government Clients—Age by Sex

Of the total clients (12,138), 6,473 (53%) were males and 5,845 (47%) females. The most common age group for males was 10 to 19 years and for females, 80 to 89 years.

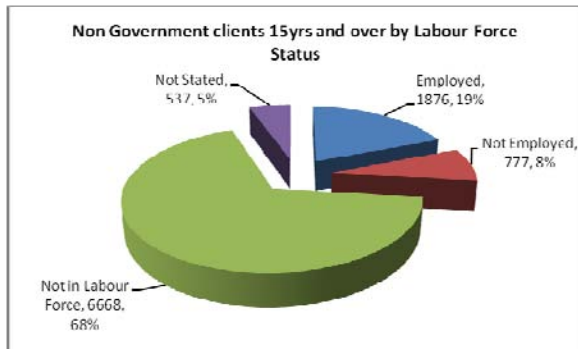

Non Government Clients—Geographical Location

73% of clients lived in the metropolitan area; 21% lived in country areas. Postcodes for 629 clients (5%) were recorded as not stated.

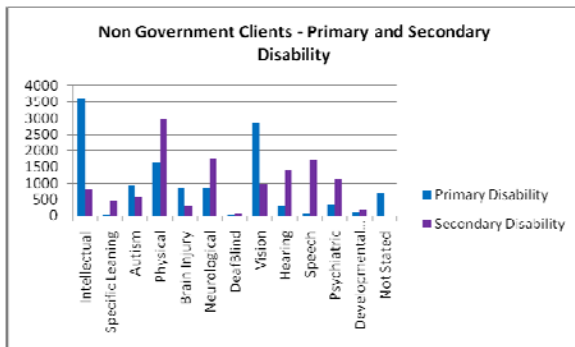

Non Government Clients—Source of Income/Labour Force Status

21% (2,627) of clients were less than 16 years where income source is not applicable. For clients aged 16 years and over (9,691), 57% of clients (5,555) identified the Disability Support Pension as their main source of income. There was 27% (2,585) of clients who were recorded with an income of not known and 5% (443) of clients were recorded as not stated.

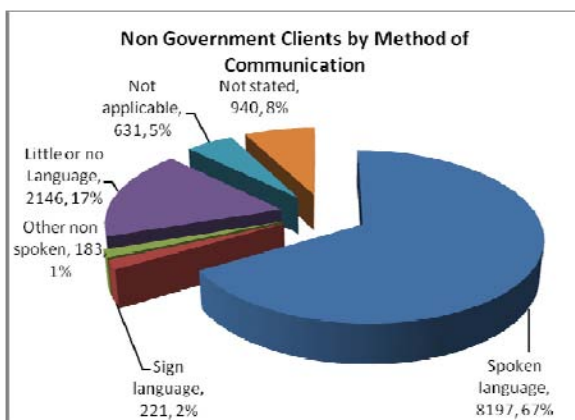

Non Government Clients—Disability Type

The highest primary disability types reported were intellectual (29%), vision (23%) and physical (13%). Secondary disability types were predominantly physical, neurological and speech.

Non Government Clients-Method of Communication.

67% of clients reported that their main method of communication was effective spoken language; 1% used other effective non-spoken language and 2% used sign language. 17% had little or no effective communication method.

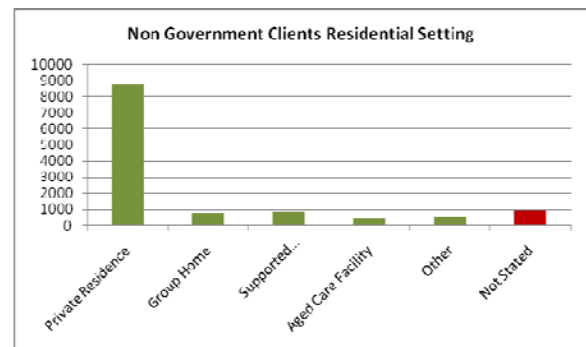

Non Government Clients—Interpreter Services

The majority of clients (87%) did not require interpreter services. 2% and 6% required an interpreter for spoken and non-spoken communication respectively.

Non Government Clients—Residential Setting

71% of clients lived in a private home. 7% lived in supported accommodation and 6% lived in group homes.

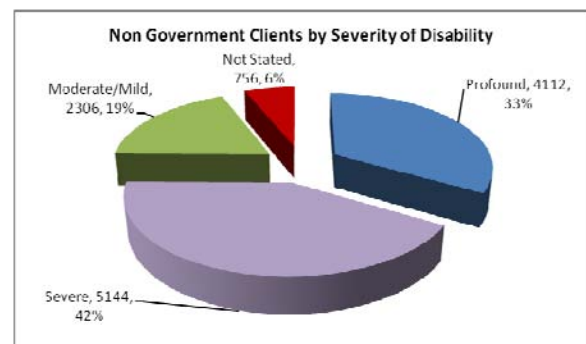

Non Government Clients—Living Arrangements

74% of clients either lived with family or with other individuals, while 19% lived alone. 7% were reported as not stated.

Non Government Severity of Disability

A total of 5,144 clients were reported with a severe disability while, 4,112 were reported as having a profound disability and always needing assistance with activities of daily living.

Note: The severity of disability assigned to each client is derived from their reported support needs in the areas of mobility, communication and self care.

NON GOVERNMENT - CARER INFORMATION

A total of 6,999 clients were supported by an unpaid carer. Of those, 6,366 (91%) were identified as primary carers – that is persons providing support with self-care, mobility or communication.

Existence of Carer	Total	%
Yes, have an unpaid carer	6,999	57%
No, do not have a carer	4,634	38%
Not stated	685	5%
Total	12,318	100.00%

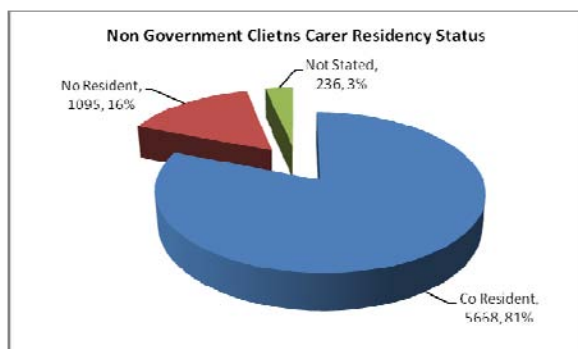

Non Government Client—Carer Age Group of Carer

The majority of carers (39%) were between 46 and 64 years of age. A further 33% of carers were 25 - 44 years and less than 1% were less than 25 years. 11% of carers were recorded with an age group of not stated.

Non Government Client—Carer Co-Residency

Of the 6,999 clients supported by a carer, 5,668 (81%) of them lived in the same household. Of the 6,366 carers with a primary status, 799 were a co-resident with a reported age of 65 yrs or more.

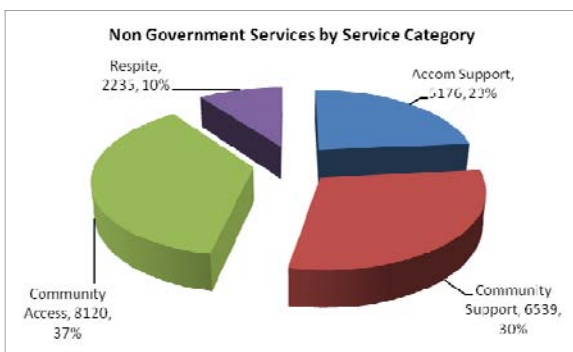

Non Government Client—Carer Relationship with Client

The majority of carers (4,187 or 60%) were identified as the mother of the client. Partners of clients (wife, husband, male/female partner) account for 17% of carers.

NON GOVERNMENT - SERVICE TYPES PROVIDED

Non Government Services by Service Categories

Of the 22,070 services provided to Non Government clients, 37% were for Community Access and 23% were for Community Support. 5,101 (63%) of the 8,120 Community Access services provided were for Learning and Life style development.

Non Government Clients leaving the Service

A total of 820 clients comprising 1,042 services left the various service types during the year. The main reasons why clients left the service type were 'other' (30%), 'client moved out of area' (22%) and 'client died' (20%)

Exit Reason	Total Services	%
No longer needs assistance - moved to mainstream	104	6.4%
No longer needs assistance - other	240	14.8%

NOTE: Individuals can receive services from multiple service types and/or service categories. The total clients should not be added. The total number of individuals for each service type is a unique total for the service type. The total service category figure is unique across the particular service category.

PART THREE - CSTDA NMDS DISTRIBUTION BETWEEN GOVERNMENT, NON GOVERNMENT AND A COMBINATION OF BOTH.

Clients may receive services from only a Government agency, a Non Government organisation or a combination of both. This section provides data that indicates unique clients who received services only from Government, Non Government or received services jointly from both.

For the purpose of this report, the reference to government refers to Disability Services only and non government may include local government, other state government agencies, for profit and not for profit organisations.

Distribution of Clients Reported

The data indicates that 20,784 individual clients accessed a funded service during 2009/10. Of these clients, 4,302 unique clients received services through both the Govt and NGO sectors while 8,466 clients received services only from Government (Disability Services) and 8,016 from non Government organisations.

Level of Severity

Joint Government and Non Government clients recorded the highest percentage of clients with a profound disability (49%).

For clients recorded as having a severe disability, there was only a small variance across the three-way split, with unique Government and joint clients being the highest and equal with 40%.

Unique Non Government clients had the highest percentage (23%) for moderate/mild disability.

Not stated responses were only identified for unique clients of non Government with 9% (756) of clients recording a 'not stated' response.

For unique clients who received a service from both Government and non Government there were no not stated responses.

Note: The severity assigned to each client is derived from their reported support needs in the areas of mobility, communication and self care.

Distribution of Services Provided

Of the 36,195 services provided in 2009/10 there were 10,808 services provided to unique Government only clients, 13,817 services provided to unique Non Government only clients and 14,481 services provided to clients of both Government and Non Government.

Of the 13,817 services provided to unique Non Government clients, 40% were for Community Access and 33% were for Community Support. 3,665 (66%) of the 5,515 Community Access services provided were for Learning and Life style development.

Of the 10,808 services provided to unique Government clients, 92% were for Community Support. Off the 9,958 services provided for Community Support, 80% were for Case Management and Regional Resource Teams.

Of the 14,481 services provided to clients who received a combination of Government and Non Government, 7,853 (54%) were for Community Support. Of the 7,853 Community Support services provided, 3,766 (48%) were for Case management.

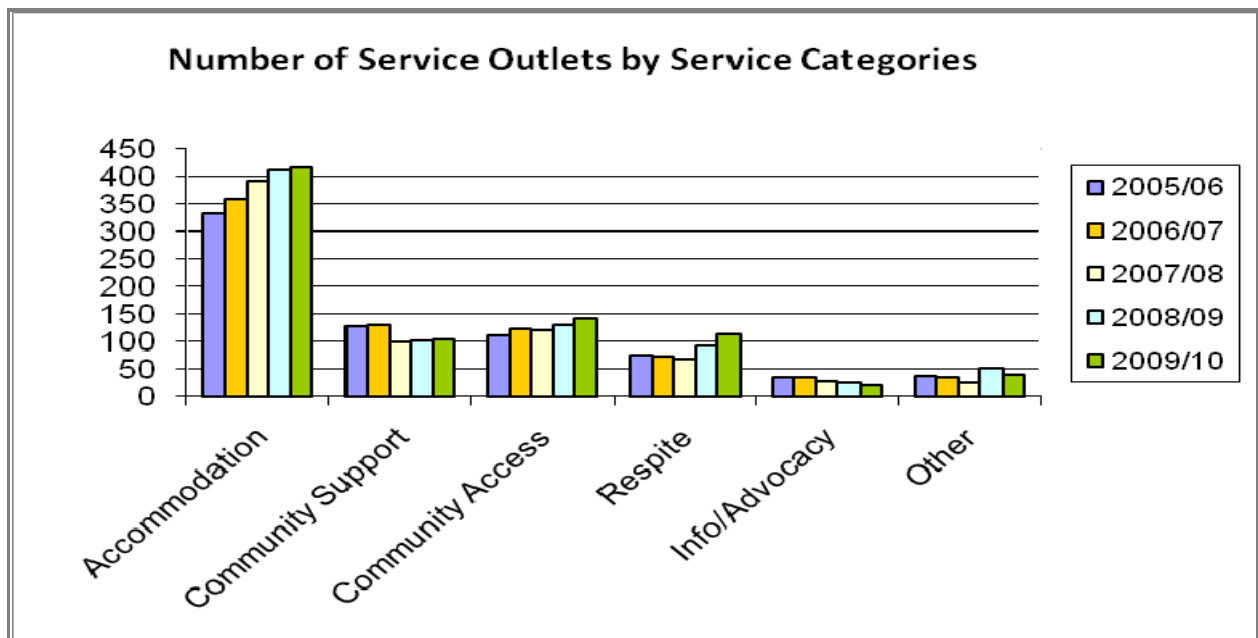

PART FOUR — CSTDA NMDS FIVE YEAR COMPARISON

The data provided is based on the final 2005/06, 2006/07, 2007/08, 2008/09 and 2009/10 DS NMDS data prepared by the Australian Institute of Health and Welfare. Information is for South Australia only. The figures in this document do not include employment services, which are managed exclusively by the Australian Government.

SERVICE TYPE OUTLET DETAILS

The total number of all Service Type Outlets participating in the data collections steadily increased between 2005/06 and 2009/10.

Of the total Service Type Outlets that have been reported under the NMDS, accommodation has consistently remained the category with the highest number of service outlets.

Location of Service Type Outlets

The majority of Service Type Outlets operating during the five year comparison were based in metropolitan locations.

Location	2005/06	2006/07	2007/08	2008/09	2009/10
Metro	519	557	575	652	658

Other Interstate	0	0	1		
Total	721	758	732	813	837

DISABILITY CLIENTS - COMPARISON DETAILS

Clients can receive more than one service type during the financial year. Therefore, total clients are less than total services provided in the reporting period.

Individual unique clients has steadily increased since the data collection commenced in 2003/04. There has been a 33.5% increase from 2003/04 to 2008/09.

	2005/06	2006/07	2007/08	2008/09	2009/10

Age by Sex

The most common age group for males is 0 – 19 years. For females the most common age groups was 50 – 59.

The male/female ratio has remained relatively constant over the five years of the data collection.

Disability Type

The proportions of disability types have remained consistent across the five years.

CARER DETAILS COMPARISON

There has generally been an improvement in the quality of the data relating to carers, with 'Not Stated' response rates reducing.

Has Carer	2005/06		2006/07		2007/08		2008/09		2009-10	
	Total Clients	% of Total Clients	Total Clients	% of Total Clients	Total Clients	% of Total Clients	Total Clients	% of Total Clients	Total Clients	% of Total Clients

Co-Residency

The proportion of co resident carers has increased over the five years, while the proportion of non-resident carers has fluctuated slightly.

The response rate for this question has increased significantly between the 2005/06 and 2009-10 financial years. 2,240 clients did not state co-residency in 2005/06 compared to 281 in 2009-10.

Relationship with Client

The rate of 'not-stated' responses has decreased dramatically from 2005/06 to 2008/09 with other categories largely stable. 'Mother' has consistently been reported as the main relationship of the carer.

Age Group of Carer

Over the five years the 25 – 44 year age group has consistently been increasing.
