

South Australian Property and Planning Atlas (SAPPA) Quick Tips

Mouse navigation

Scrolling your mouse wheel will zoom and left click drag will pan the map

Quickly find a location

Type a location such as an address, postcode or suburb into the top 'Search Bar'

View information available at a location

Right-click anywhere on the map from a PC or press your finger down for 2 or 3 seconds on the map to view information in the 'Info' panel for that location

See a different base map view

Click the top right drop-down button to select a base map next to the 'Help' button.

See multiple layers better

Reduce a base map's visibility.

See land parcels better

In 'Layers' select yellow outline parcels to view better over imagery.

Print a map view

Click the 'Map Report' button located on the top toolbar or in the Tools panel

Display or go to a set of coordinates

Click the 'Coordinates' button in the 'Tools' panel

Zoom using a mouse selected window

Hold 'Shift' key down and select a zoom window using your mouse

Find and select features

Select features to populate information into reports:

- 'Find' button on top menu bar for using textual searches
- Graphically with your mouse using the top toolbar or 'Tools' panel
- Left-click when  appears over a highlighted feature or drawing and click the 'Select' button.

Control selections – land parcels, survey marks, place names and applications

With the top toolbar or in the 'Tools' panel you can:

- Set whether to create a new selection each time, or modify the existing one
- Set which features to select or open a 'Report' for a previous selection.
- Choose which tool to graphically select with
- Clear your current selection
